AUTOMOTIVE RECRUITMENT

---

# THE AUTOMOTIVE TEAM

---

Since the turn of the century the Automotive industry has been engaged in a perpetual cycle of development and evolution, fostering innovation and change to meet the constantly transforming landscape of cultural, economic, and environmental challenges that drives the sector forward in the realms of technology, manufacturing, and engineering.

To meet the demands of this ever-diverse and revolutionising industry, Orion Electrotech has been on the forefront of the recruitment need, supporting some of the UK's most prominent Original Equipment Manufacturers (OEMs), 1<sup>st</sup> and 2<sup>nd</sup> Tier suppliers, and Consultancies in their hiring efforts.

With the development and progression of technologies and approaches, there is an ever-growing need not only for a deep understanding of legacy, exiting, and future disciplines, but also for talent that will bridge the gap between them with enthusiastic and out-of-the-box ideas and acuity.

Armed with a dedicated and specialist team of Automotive experts, Orion Electrotech offers support for both contract and permanent recruitment across four core focusses within the Automotive Industry.

## Hardware, Software, and Electronics

Battery, Electric Vehicle (EV), and [Plug-in] Hybrid Electric Vehicle (HEV/PHEV)

## REVIEWS

---

*"Dan and the team at Orion did an excellent job for me in securing my most recent contract. Over the years I have dealt with several recruitment consultants who did not do what they said they would so it was refreshing to deal with somebody who did. I always found him to be proactive, vey professional and somebody that I would be happy to do business with again."*

**- LinkedIn Review from Composite Design Engineer**

*"I would highly recommend working with Peter and Orion Electrotech. The transition to securing my new position at this company has been an extremely smooth experience and his professionalism has been flawless.*

*Thank you very much for your hard work and helping me secure my position!"*

**- LinkedIn Review from ECU Systems Engineer**

*"Dan was very helpful in enabling me to secure an exciting position with a respected automotive company that is relevant to my interests. His communication was excellent throughout the process and he helped to greatly facilitate arrangements between the company and myself."*
